

Horse Intraday MR Weighted Checklist

Checklist Table

Category	Criteria	Weight
1. Location	Price is at a key contextual level (e.g., prior high/low, VWAP, order block)	+2
	Price is near a significant support/resistance zone	+1
2. Flow	Observable absorption at the level	+2
	Clear imbalance or aggressive buying/selling pressure	+1
3. Context	Aligns with higher timeframe trend	+2
	Market structure supports the trade idea	+1
4. Price Action	Presence of a recognizable setup (e.g., pin bar, engulfing pattern)	+2
	Some evidence of constructive price action	+1
5. Risk Management	Favorable risk-to-reward ratio (e.g., at least 1:2)	+2
	Stop-loss placement is logical and respects market structure	+1
6. Trade Management	Clear plan for trade management and exit strategy	+1
7. Additional Factors	Supporting indicators or confluences (e.g., volume spike, divergence)	+1
8. Momentum Shift	Momentum clearly shifting (e.g., seller failure, buyer strength after test)	+2

Weighted Trade Checklist

Trade Entry Guidelines

- Strong Setup (Score ≥ 10): Full position size
- Moderate Setup (Score 7-9): Half position size
- Weak Setup (Score < 7): Avoid the trade

Implementation Tips

- Pre-Trade Analysis: Before entering a trade, go through each criterion and assign the appropriate weight based on current market conditions.
- Documentation: Keep a record of each trade's checklist scores to analyze performance over time.
- Continuous Improvement: Regularly review and adjust the checklist criteria and weights based on your evolving trading strategy and market experience.
